

Flexible Ballistic Materials

**Bullets
Blast Debris
Slash Attacks
Intruders**

- Para-aramid, all fabric construction
- UL752 Level 2 & 3 certified
- Flexible, lightweight
- NFPA 701 flame propagation resistance
- Waterproof/sealable
- Easy installation and setup
- Removable/portable
- Large and tailored sizing
- Customizable cover fabrics

EXPANDING the Boundaries of Protection

Product Features

- Patented Energy Dissipation System
- Construction:
 - Kevlar® fiber para-aramid core
 - Polyester cover material shell
 - Polyester/nylon support materials
- Pre-certified solutions:
 - UL 752 Listed Level 2 or Level 3
 - V50 tested for bullet and fragmentation threats (Mil-Std 662)
 - Fire propagation resistance to NFPA 701
- Custom-designed specific certifications as needed:
 - Blast debris/fragment resistant (equivalent protection to MSV)
 - UV and environmental testing
 - Intruder prevention
- Flexible, can conform to any shape
- Made in the USA and Berry Amendment Compliant

Fully Customizable

- Up 106" wide and 103" long per panel
- All standard military colors available
- Color customization
- Custom print patterns (OCP, MARPAT, Multicam...)
- Custom fabrics can be adhesively laminated to the outside surface

Flexible Ballistic Fabric vs. Rigid Materials

	Para-Aramid Fabric	Glass	Transparent Plastic	Steel	Fiberglass
Handgun Protection	Yes	Yes	Yes	Yes	Yes
Rifle Protection	No	Yes	No	Yes	Yes
