and Curtains

# Protection Solutions to Safeguard Our Schools

## Roll-Up Shades and Door Shields

- Window and door covers deploy like a conventional motorized window shade from above the frame
- Motor controls will function with a wall switch, wireless remote, or by connecting to an existing alarm system
- For added stability on smaller windows/doors, outdoor use, and recommended applications, two types of retention devices can secure the bottom of the covers:
  - Cable guides
  - Locking hem bars

**Roll-Ups mount above the window or door frame**

**Cable guide retention**

**Locking hem bar retention**

## Direct Mount Door Shields

- Mount directly to the doors, staying fixed in place all the time
  - Installs in minutes
- Variations exist for all knob, lever, or push bar closures
- Protective covers allow window inserts to remain functional but completely obscured and protected in an emergency

**Mounts into door slab**

**Accommodates all door types**

	Window Shades	Door Shields	Hallway Barriers
Size Range	Up to 106" wide per panel	Up to 48" x 96"	Up to 106" x 103"
Covering Styles	Roll-Up Shade Pull Curtain	Roll-Up Cover Direct Mount to Door	Roll-Up Barriers Lateral Driven Curtain
